

Position:

Pediatric Orthopedic Surgeon with Subspecialty Training

Why Mayo Clinic

Join the authority in medicine and partner with the nation's best hospital (U.S. News & World Report 2021-2022), ranked #1 in more specialties than any other care provider. At Mayo Clinic, we believe there is a better path to healing that humanizes the practice of health care and inspires hope in the people who need it most. You will be part of an amazing diverse team committed to solving the most serious and complex medical challenges – one patient at a time.

Position description

The Department of Orthopedic Surgery at Mayo Clinic in Rochester, MN is seeking a fellowship trained surgeon to join our Pediatric practice. This position includes primary responsibilities in Rochester with potential outreach opportunities in our regional practice. The position will include clinical and surgical responsibilities in pediatric orthopaedic surgery with a subspecialty focus in pediatric spine and/or pediatric hip. This individual must have experience/qualifications to take pediatric call at a tertiary referral Level 1 trauma center. It is expected that this individual will have completed specific fellowship training in both pediatric orthopedic surgery and a subspecialty within pediatrics.

A strong commitment to integrated clinical or basic science research and orthopedic education is expected. The position is 1.0 FTE clinical/surgical into which the candidate is expected to build a clinical or basic science research and education footprint. The individual will serve as faculty to residents with additional teaching opportunities in the affiliated medical school and with trainees in other departments. Protected time for research and education can be earned as the clinical practice matures, while the primary focus is establishing a differentiated, destination surgical practice.
