

Wake Forest School of Medicine is seeking a national leader as our new Chair of the Department of Orthopaedics.

This is a unique opportunity to lead a thriving academic and clinical department (26 academic locations, 3 research laboratories, 70 faculty, 2 residencies, 6 fellowships) and build on prior success, leveraging the talents of a diverse group of faculty, staff, residents, fellows, and students as our medical school and health system enter into a period of unprecedented growth including the construction of a second medical school campus in Charlotte, North Carolina.

The department is characterized by a highly collaborative and transparent culture where faculty have mutual respect for one another and are valued for their clinical, research and educational contributions and are supported in their growth in their particular areas of strength and interest. The department is very well rounded, and has high morale, very low turnover and our residency and fellowship programs are highly competitive and respected.

About Wake Forest

Atrium Health Wake Forest Baptist Health is a nationally recognized academic health system in Winston-Salem, NC, with an integrated enterprise serving 24 counties in NC and Virginia. It comprises a regional clinical system with more than 300 locations, 2,100 physicians and 1,535 acute care beds.

In 2020, Wake Forest Baptist Health and Atrium Health officially joined together as a single enterprise. Atrium Health has announced \$3.4 billion in planned investments in our health system and the communities we serve.

Winston-Salem

Located in North Carolina's Piedmont Triad region, Winston-Salem features a moderate climate with all four seasons and housing costs ≈30% below the national average. Residents enjoy a vibrant restaurant scene, strong public/private schools, enthusiastic support for the arts, and close proximity to the Appalachian Mountains and Atlantic Coast beaches.
